THACKER'S
REDUCED SURVEY MAP
OF
INDIA

EDITED BY

J. G. BARTHOLOMEW, F.R.G.S.

FIFTH EDITION

EXTENDED AND REVISED TO DATE

WITH INSET PLANS OF CALCUTTA, BOMBAY, AND MADRAS, AND GENERAL INDEX

THIS Map is an accurate reduction of the Ordnance Survey of India to the scale of 69 miles to an inch. It gives in as minute detail as the scale will permit all the leading features on the general survey sheets, together with the results of the Frontier and other Geographical Surveys. The spelling of the place-names is according to the system adopted by Sir W. W. Hunter in his "Imperial Gazetteer of India," and every place mentioned in that work is shown on the Map. The Index gives the location of each of the ten thousand names which appear on the Map.

NOTE TO FIFTH EDITION

In its Fifth Edition the whole Map has been corrected to the present date, and shows the latest railways, with the recent political and other changes.

CALCUTTA: THACKER, SPINK, & CO.
LONDON: W. THACKER & CO.

BARTHOLOMEW'S

COMMERCIAL AND LIBRARY CHART OF THE WORLD

On Mercator's Projection Size—6 Feet × 4 Feet

THIS New Map has been issued in response to many requests for a really good Wall Map of the World at a moderate price. The plates have undergone a very thorough revision before printing, and the Map may be relied upon as being the best and most up-to-date of its kind. Beautifully printed in colours, the Map is one which will prove of the utmost value to all Business Men, Libraries, Public Institutions, Schools, etc., etc. Besides numerous other features which this Map shows may be mentioned the following:—

1. Steamship Routes are shown by bright blue lines, and authentic deep sea soundings are indicated, also the limits of drift ice from the Poles.
2. The Great Through Railway Lines are marked, also the Chief Canals, especially such as connect Navigable Rivers.
3. Submarine Cables and Great Telegraph Lines are clearly indicated.
4. The Political Boundaries of the various countries are shown in colour. The United Kingdom and the widely-distributed Colonies, Dependencies and Protectorates of the British and other Empires are distinguished by special colours.
5. Inset Charts of the North and South Polar Regions.
6. The Currents of the Ocean are shown in colour—distinguishing between Cold Currents and Warm Currents.
7. On the margin, figures are given indicating the time by the clock when noon at Greenwich, also figures to indicate the duration of the longest day.
